Roger, I think your group is better equipped to answer Gary's questions. I'll schedule a time to discuss. Would like to respond as soon as possible.

Thanks.

Candace

Candace:

Attached is my presentation. In return, would you send me information on SCoR, since this new cigarette was announced at the PM stockholders' meeting which was also open to the public. As you may know, Dr. John Pauly, a member of the Roswell Park faculty, attended that meeting.

Specifically, would you please provide answers to the following questions about SCoR:

1. Is SCoR being test marketed currently? If yes, under what brand name(s) and where? When did the test marketing begin?
2. If SCoR is not being tested currently, when will it be made available to the public?
3. Will the SCoR product continue to use a defective cellulose acetate filter that releases filter fibers into the mouths of smokers?
4. Can you send us samples of the SCoR product that we can test?
5. Can you provide the information to support your CEO's claim made at the stockholders' meeting that SCoR is a reduced risk product, or will your company keep this information secret?
6. Can you share with me the time table your company has for replacing your current product line of highly lethal products with SCoR performance features since you claim that such features would reduce risk?

I look forward to your answers to my questions.
Gary Giovino

Subject: Trends in smoking presentation

Dr. Giovino, I recently learned that you gave a presentation entitled "Trends in Smoking" at a recent (July 2004) IOM session on Reducing Tobacco Use: Strategies, Barriers, and Consequences. Given that your presentation was part of the meeting that was open to the public, would you kindly send me a copy of your presentation? You can send it either by e-mail (reply to the present one) or mail it to me at the following address:

Dr. Candace R. Adams
